

HUNGARIAN WATER TREATMENT CLUSTER

PROJECT AND COMPANY MANAGEMENT

ENGINEERING AND ECONOMIC CONSULTANCY

CONSTRUCTION & RECONSTRUCTION

PROJECT AND COMPANY MANAGEMENT

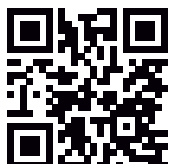

- Project organization
- Project management
- Change management
- Operational advice
- Implementation of risk assessment system, analyse potential risk and planning responses
- Introduction of a system of reports, defining performance indicators
- Guaranteeing water quality according to standards
- Water quality control
- Development of up-to-date customer service systems
- Professional training courses, programmes
- Workforce management

ENGINEERING AND ECONOMIC CONSULTANCY

- Technical development
- Developing „Event management manuals”, organising drills
- Organising „Disaster Response Team”
- Development and trade of mobile water purifiers
- Technical and economical audit
- Reduction of non-revenue water
- Technological process control (SCADA)
- Designing workflow tracking and management systems
- Building geographic information systems (GIS)
- Modelling of network reconstruction
- IT Strategy development for water utilities
- Water loss analysis
- Discovery of hidden leakages
- Design, installation and commissioning of continuous network monitoring system

CONSTRUCTION & RECONSTRUCTION

- Construction of public utilities (water, wastewater)
- Trenchless (NO-DIG) public utility reconstruction
- Construction of water treatment plant
- Construction of wastewater treatment plant
- Stormwater treating and management
- Construction of stormwater protection structures
- Conservation of natural habitats
- Inspection of pipes with closed-circuit television
- Mechanical cleaning and disinfection of pipelines
- Construction, reconstruction and cleaning of shaft wells, horizontal wells and drilled wells
- Internal reconstruction and coating of potable water reservoirs, insulation against precipitation water
